Design Systems in Practice

Instructor: Elena Larkspur | A fictitious course created for the Blazor Bootstrap showcase

How to use this handout

Keep it open next to the lessons. Each module has key ideas and a short checklist. Work through one module per evening and tick the checklist before moving on.

Module 1: Tokens and themes

- Key idea: tokens and themes is easiest to learn on one small, real task.
- Key idea: change one thing at a time and check the result.
- Watch for: copying the example without adapting it to your case.

Module 2: Component APIs

- Key idea: component apis is easiest to learn on one small, real task.
- Key idea: change one thing at a time and check the result.
- Watch for: copying the example without adapting it to your case.

Module 3: Governance and adoption

- Key idea: governance and adoption is easiest to learn on one small, real task.
- Key idea: change one thing at a time and check the result.
- Watch for: copying the example without adapting it to your case.

Checklist

Module 1: Tokens and themes

- [ ] I watched the overview and paused to try each step.
- [ ] I applied the reading to one small task of my own.
- [ ] I answered the self-check in my own words.

Module 2: Component APIs

- [ ] I watched the overview and paused to try each step.
- [ ] I applied the reading to one small task of my own.
- [ ] I answered the self-check in my own words.

Module 3: Governance and adoption

- [ ] I watched the overview and paused to try each step.
- [ ] I applied the reading to one small task of my own.
- [ ] I answered the self-check in my own words.
